- Road call assistance.

Hafilat Industries has been awared ISO 9001:2008, ISO 14001 : 2004 & ISO 18001 : 2007 quality magagment certificates for the scope of (bus body assembly, refurbishment / modification and maintenance).

Client Satisfaction is Our Target
Vehicle Saftey on Roads is Our Priority

Safety

Safety is a prime concern at Hafilat; an aspect we hold in higher regard than any other factor. This Grain of thought has led to a considerable investment in safety at all stages, starting from the factory floor.

In this capacity, Hafilat invests heavily in numerous avenues spanning floor space, plant quality, equipment and information technology. However, the biggest investment remains centred around our people - a highly trained select group of individuals that continue to push the envelope in terms of research, design, manufacture and support.

The proof of the success of this strategy is reflected in a sterling safety record, and buses that have passed the most stringent of global safety and structural testing, including ADR, the ECE and the USA side impact tests. Furthermore, we carry out our own wave of internal laboratory testing, designed to provide the end-user with the most sophisticated products in the industry.

It is this firm commitment to impeccable safety that has made the Volgren design and Hafilat manufacturing process a global method and a product of international standards.
